

2014 RAM 2500 4WD 5" BASIC SYSTEM

OVERVIEW

This high quality system has been designed to retain the factory load carrying capacity and ride of the vehicle with minimal parts.

The stock coil springs are retained with angular steel spacers to retain the factory front spring bow. This is an important feature as Chrysler designed the bow to aid in their unique alignment specs and ride quality. Flat spacers do not provide this. The rear coil springs are also retained with steel spacers keeping the weight carrying capacity of the vehicle intact.

A Fabtech exclusive on this system is the steel front bump extensions. They will not blow out like extra long urethane bump stops found in other aftermarket suspensions. No chance of spring and shock damage with the Fabtech steel extensions.

The factory Radius Arms are relocated with heavy duty 1/4" thick steel brackets for proper caster with the 5" lift. Super stout front and rear Track Bar drop brackets center the axles under the vehicle with the new ride height.

The 5" Basic System will clear 37" tall tires and is available with Fabtech Performance Twin Tube shocks or high end Dirt Logic Monotube shocks.

FEATURES & BENEFITS

- Retains factory coil springs for proper handling and load carrying capacity
- Radius Arm drop brackets provide increased caster
- Steel bump stop extensions will not blow out like extra long urethane stops will
- 1/4" thick steel bracket construction throughout for added strength
- Available with Performance shocks or Dirt Logic 2.25 shocks
- Allows use of 37" tall tires
- Includes Free 5 year 60,000 mile Powertrain warranty

INSTALLATION & TECH

- Estimated installation time - 4.5 Hours
- Amount of holes to drill for installation - 10
- Welding Required - No

TIRE & WHEEL SIZES

Tire - 37x12.50/R17	Wheel - 17x9 w/5" BS w/minor trimming
Tire - 37x12.50/R18	Wheel - 18x9 w/5" BS w/minor trimming
Tire - 37x13.50/R20	Wheel - 20x9.5 w/5" BS w/minor trimming
Tire - 37x13.50/R22	Wheel - 22x11 w/5" BS w/minor trimming
